With an **extensive global manufacturing footprint**, Valeo supplies both **Original Equipment vehicle manufacturers (OEMs)** and the independent aftermarket. Leveraging the same engineering expertise and quality standards developed for OEM production, Valeo after-market products deliver dependable performance and long term reliability across diverse automotive systems.

Official Partner

A global leader in manufacturing both Original Equipment and Aftermarket automotive parts since 1923.

Specialists in engineered filtration solutions for OEM, heavy-duty and industrial applications worldwide since 1915.

Other Brands

Bosch, AC Delco, Mopar, Denso, Motorcraft, Goodyear, Michelin, Depo, etc.

PRODUCT - Lubricants

VALEO

ENGINE LUBRICATION SOLUTION

Valeo lubrication solutions are **engineered** to **deliver thermal stability**, **friction control** and **protection** against **component wear** across modern automotive systems. The range supports **reliable engine operation** and **cleanliness** under demanding operating conditions.

PASSENGER CAR RANGE

39 part numbers **16** products: 11 motor oils, 4 transmission oils, 1 hydraulic fluid

VALEO LUBRICANTS
— THE SMART CHOICE

PRODUCT - Filtration

VALEO ENGINE FILTRATION SYSTEM

This delivers a comprehensive range of **premium-quality filters** designed for aftermarket professionals. Including oil, fuel, cabin and air filters, the range ensures **high-precision filtration to protect engine components and maintain optimal performance**. Backed by AA Mobility's maintenance expertise, these solutions provide **reliability, durability, and consistent engine protection**.

CABIN FILTERS

PRODUCT - Filtration

DONALDSON ENGINE FILTRATION SYSTEM

This system provides a comprehensive portfolio of **heavy-duty filtration solutions** engineered for commercial, industrial, and off-highway applications. Covering air intake, fuel systems, lubrication, hydraulic circuits, cooling systems, and emissions management, the range delivers high-efficiency contaminant control to safeguard critical engine and equipment components. Built on decades of filtration engineering expertise, Donaldson solutions are designed to withstand demanding operating environments while maintaining performance reliability, extended service life, and consistent equipment protection.

PRODUCT - Braking

VALEO BRAKING SYSTEM

This delivers a complete, **premium braking solution** covering pads, discs, fluids, and hydraulic components. Engineered for reliable stopping power, balanced performance, and effective heat control in all driving conditions. Designed to provide long-lasting safety, comfort, and confidence for independent automotive professionals.

BRAKE PAD

BRAKE DISC

BRAKE MASTER CYLINDER

BRAKE LINING

BRAKE SHOE

PRODUCT - Clutch

VALEO CLUTCH SYSTEM

This systems provide a **comprehensive solution** for **efficient, smooth,** and **reliable** power transfer across all powertrain architectures. Engineered to OE standards, Valeo clutch kits and components deliver proven durability, driving comfort, and performance even in demanding conditions.

CLUTCH DISC | PRESSURE PLATE | RELEASE BEARING

CLUTCH MASTER CYLINDER | CLUTCH SLAVE CYLINDER

PRODUCT - Air Conditioning

VALEO AIR CONDITIONING SYSTEM

This system offers **high-performance OE-quality** components engineered for **optimal cooling efficiency** and cabin comfort. Designed to meet **strict automotive** technical and **safety standards**, the range ensures reliable operation in all climate conditions. With **advanced technology** and proven expertise, Valeo delivers **durable** and **energy-efficient** solutions for the aftermarket.

PRODUCT - Accessories

VALEO WIPER & LIGHTING SYSTEM

This delivers OE-quality **performance, safety,** and **innovation** for both manufacturers and the aftermarket. From advanced front and rear wiper blades to high-performance lighting components and bulbs, Valeo ensures optimal visibility in all driving conditions. Supported by global R&D expertise, Valeo combines safety, efficiency, and sustainability in every solution.

REAR LAMP

OTHER BRANDS - Supply Structure

OEM

Factory-New Components

Brand-new components manufactured through authorized OEM production by original vehicles manufacturers such as Toyota, Mitsubishi and Mercedes Benz. Supplied in original factory condition.

REMANUFACTURED

Certified Remanufactured Components

Genuine OEM core units restored through controlled remanufacturing processes and validated to meet defined performance standards.

USED

Quality-Inspected Used Components

Genuine OEM components recovered from operational vehicles, inspected, functionally verified, and professionally graded for controlled resale applications.

WARRANTY COVERAGE

3-12 MONTH LIMITED WARRANTY

OEM ✓ REMANUFACTURED ✓ QUALITY-INSPECTED USED ✓

Warranty coverage applies across all supply tiers ·

- Coverage varies depending on component category and supply tier.
- Extended warranty coverage when installed by AA Mobility Group.
- Protection against verified manufacturing defects and functional failures.

Terms & Conditions Apply

OTHER BRANDS - Body Parts & Lighting

These provide essential exterior components engineered to ensure **visibility, safety,** and **structural integrity** across passenger and commercial platforms. From precision lighting assemblies to durable body panels and impact protection parts, the range supports reliable performance, regulatory compliance, and accurate vehicle restoration. Designed for consistent fitment and long-term durability, these components enable **efficient repair** and **replacement** across diverse operating conditions.

DOOR PANEL

OTHER BRANDS - Engine Management

This system provides precision control over **ignition, fuel delivery** and **electronic engine regulation** to ensure optimal performance and efficiency. From spark plugs and fuel injectors to advanced engine control units and critical monitoring sensors, these components work together to maintain combustion accuracy, emissions compliance and system reliability. Engineered to meet strict automotive performance standards, the range supports **consistent operation, diagnostic compatibility** and **long-term durability** across modern powertrain platforms.

FUEL INJECTOR

ENGINE CONTROL UNIT

SENSOR

OTHER BRANDS - Suspension System

These are engineered to maintain vehicle **stability, steering precision** and **ride comfort** across varying road conditions. Comprising structural linkage components and ride control elements, the system ensures controlled wheel movement, effective impact absorption, and consistent tire contact with the road surface. Manufactured to meet strict durability and performance standards, these components support **long term reliability, balanced handling** and **safe vehicle operation**.

CONTROL ARM | BALL JOINT | TIE ROD END

STABILIZER LINK | SHOCK ABSORBER | BUSHING & MOUNT

OTHER BRANDS - Engine | Gearbox | Axle

Engine, Gearbox, and Axle assemblies are available across **all supply tiers: OEM, remanufactured, and quality-inspected used** components. Each unit is supplied with verified functionality and warranty coverage, with installation and fitment support provided by AA Mobility Group.

ENGINE

GEARBOX

AXLE

OTHER BRANDS - Tyre & Battery

High-quality tyres and automotive batteries supplied in multiple sizes, specifications, and configurations, sourced from recognized industry brands. Designed to support **safe journeys** and **dependable vehicle performance, delivering confident road grip** and **reliable starting power** in all driving conditions. Supply and fitment are provided through AA Mobility Group Tyre & Battery Centers, including complimentary testing and fitment services at participating locations.
